SUMMARY

Backend Engineer with more than 6 years of experience building ecommerce, payments, subscriptions, and ticketing platforms on AWS. At Trade (Ecuador) I build serverless services and payment integrations for brands such as KFC, Multicines, Xmart, and Pure Nature. I prioritize code quality, data security, and good practices to deliver reliable, maintainable software.

TECHNICAL SKILLS

Languages & Frameworks: Python, TypeScript, Node.js, NestJS, Django, FastAPI, PHP (Laravel)
AWS: Lambda, API Gateway, SAM, SQS, SNS, EventBridge, Step Functions, DynamoDB, ElastiCache, S3, ECS, CloudFormation, Cognito, RDS, OpenSearch
Databases: MySQL, PostgreSQL, MongoDB, DynamoDB, Redis
Payments & Integrations: Deuna, Credibanco, PSE, PlaceToPay, Datafast, PagoPlux, Kount (anti-fraud), SAP, Vista, Masivo, Firebase
DevOps & CI/CD: Docker, Kubernetes, GitHub Actions, Jenkins, AWS CodePipeline, Terraform, Pulumi
Architecture & Testing: Microservices, Serverless, Hexagonal Architecture, DDD, SOLID, RESTful APIs, Jest, pytest

CERTIFICATIONS

AWS Certified Developer – Associate — Amazon Web Services | Verify on Credly 2026

PROFESSIONAL EXPERIENCE

Trade

Oct 2024 – Present

Backend Engineer *Ecuador*

Ecommerce, payments, and ticketing platform for KFC, Multicines, Xmart, Pure Nature, El Corral, Independiente del Valle, and Liga.

Multicines — Subscriptions & Ticket Sales

- Built the Cinefan subscription service (Lambda, EventBridge, DynamoDB, SQS, MongoDB): billing, automatic renewal, cancellation, and failed-payment handling.
- Extended the Multicines middleware (NestJS on Amazon ECS) that connects ticket sales, snacks, and payments to the Vista cinema system, and added Kount anti-fraud.
- Automated customer migration to the Masivo loyalty platform with Step Functions, SQS, DynamoDB, and S3, using batch processing and retries.

Payments — Xmart & Multi-brand

- Integrated six payment gateways (Deuna, Credibanco, PSE, PlaceToPay, Datafast, and PagoPlux) with charges, reversals, cancellations, and webhooks, using a Redis cache (ElastiCache).
- Exposed payment routes through the platform's API Gateway and masked card data in logs to protect sensitive information.

Ticketing — Independiente del Valle & Liga

- Developed ticket sales on AWS Lambda: seat map, reservations, purchase limits, personalized tickets, and push notifications with SQS and Firebase.

Integrations — Pure Nature, KFC & Multicines

- Integrated Pure Nature orders with SAP through OAuth and status synchronization, and connected KFC and Multicines to the Masivo rewards platform.
- Supported transactional and notification microservices in PHP (Laravel).

Platform Ecosystem

- Worked on a platform of 30+ services and applications: serverless API Gateways, catalog synchronization (Step Functions, SQS, MongoDB), order distribution (NestJS, SQS), fulfillment, web and mobile apps (Next.js, Expo), and self-service kiosks.

Indra
May 2024 – Oct 2024

Backend Developer — *Lima, Peru*

- Developed the Excel and PDF reporting module for the Rimac Seguros Legal Management system with Python and Pandas.
- Implemented CI/CD (Jenkins, AWS CodePipeline, GitHub Actions) and infrastructure as code (AWS CloudFormation, Pulumi).
- Participated in technical candidate selection and in training new team members.

IoTecnova
Feb 2021 – May 2024

Backend Developer — *Lima, Peru*

- Built Asisten SOS, a real-time health consultation platform (Python, Django), and led its migration from a monolith to microservices on AWS.
- Improved resilience and error handling by 40% and reduced deployment times by more than 29% through CI/CD.
- Applied Hexagonal Architecture, DDD, and automated tests with pytest to improve system quality and scalability.

Kibernet
Jun 2020 – Jan 2021

Full-Stack Developer — *Lima, Peru*

- Developed the Tytroll registration and logistics system for Rimac Seguros (Python, Django, Kafka) and deployed it on AWS with Docker and Kubernetes.
- Implemented RESTful APIs and unit and integration tests with pytest.

EDUCATION

Universidad Nacional de San Cristóbal de Huamanga
Ayacucho, Peru

Bachelor of Science in Systems Engineering
